This facility is classified as an Industrial User of Concern discharging approximately 22,680 gallons per day (GPD), monthly average, of combined wastestream (17,680 GPD – Sanitary waste, 5,000 GPD Process waste) generated from its printing press operation and offices. The wastes are metered leaving the facility. Sanitary and process wastes are metered and calculated separately; one (1) meter for process wastes and two (2) meters are used to calculate the sanitary waste discharge. All three (3) meters are read monthly (beginning of the month) and are calibrated annually.
