

NEW JERSEY ENVIRONMENTAL INFRASTRUCTURE FINANCING PROGRAM

Contract 35 rebid II

Construction of upgrades and improvements to the Rockaway Valley Regional Sewerage Authority (RVRSA), Rockaway River Regional Interceptor Boonton Section Replacement Project, located in the Town of Boonton on Washington Avenue and Pocket Park at a cost of \$1,026,000 dollars, were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits, including demolition, removal and replacement of the existing siphon outlet chamber located in Pocket Park, removal and replacement of existing 141-LF of 48-inch diameter of deteriorated RCP pipe from the siphon outlet chamber and across Washington Avenue, and a new custom CCFRPM pipe filling with a new FRP manhole riser and appurtenances to serve residents and business in the RVRSA Service Area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
